IN THE CLAIMS

1. (original) A method for providing particularized credit to a user in an electronic content distribution system that implements a network, the method comprising:

receiving an identifier for a given read only optical storage medium through the network, the identifier indicating that the given read only optical storage medium contains a particular content; and

providing a particular credit to the user based upon receipt of the identifier, wherein the particular credit is usable for receiving the particular content through the electronic content distribution system.

- 2. (original) The method of claim 1, wherein the particular content includes a musical work.
- 3. (original) The method of claim 1, wherein the particular content includes a musical compilation comprising a plurality of musical works.
- 4. (original) The method of claim 1, wherein the identifier is a digital fingerprint that identifies the given read only optical storage medium.
- 5. (original) The method of claim 1, wherein the given read only optical storage medium is a compact disc.
- 6. (original) The method of claim 5, wherein the network is an Internet.
- 7. (original) The method of claim 6, wherein the particular content includes a musical work.
- 8. (original) The method of claim 6, wherein the particular content includes a musical compilation comprising a plurality of musical works.
- 9. (original) The method of claim 7, wherein the electronic content distribution system downloads the musical

work to the user pursuant to a transaction including a redemption of the particular credit by the user.

- 10. (original) The method of claim 7, wherein the electronic content distribution system streams the musical work to the user pursuant to a transaction including the redemption of the particular credit by the user.
- 11. (original) An apparatus for providing particularized credit to a user in an electronic content distribution system that implements a network, the apparatus comprising:

means for receiving an identifier for a given read only optical storage medium through the network, the identifier indicating that the given read only optical storage medium contains a particular content; and

means for providing a particular credit to the user based upon receipt of the identifier, wherein the particular credit is usable for receiving the particular content through the electronic content distribution system.

- 12. (original) The apparatus of claim 11, wherein the identifier is a digital fingerprint that identifies the given read only optical storage medium.
- 13. (original) The apparatus of claim 11, wherein the given read only optical storage medium is a compact disc.
- 14. (original) The apparatus of claim 13, wherein the particular content includes a musical work.
- 15. (original) The apparatus of claim 13, wherein the particular content includes a musical compilation comprising a plurality of musical works.
- 16. (original) The apparatus of claim 14, wherein the electronic content distribution system downloads the musical work to the user through an Internet connection pursuant to a transaction including a redemption of the particular credit by the user.

- 17. (original) The apparatus of claim 14, wherein the electronic content distribution system streams the musical work to the user through an Internet connection pursuant to a transaction including a redemption of the particular credit by the user.
- 18. (original) A system for providing particularized credit to a user in an electronic content distribution system that implements a network, the system comprising:

a processor; and

- a memory, in operative communication with the processor, that stores instructions that are executed by the processor to effectuate receiving an identifier for a given read only optical storage medium through the network, the identifier indicating that the given read only optical storage medium contains a particular content, and providing a particular credit to the user based upon receipt of the identifier, wherein the particular credit is usable for receiving the particular content through the electronic content distribution system.
- 19. (original) The system of claim 18, wherein the identifier is a digital fingerprint that identifies the given read only optical storage medium.
- 20. (original) The system of claim 18, wherein the given read only optical storage medium is a compact disc.
- 21. (original) The system of claim 18, wherein the particular content includes a musical work.
- 22. (original) The system of claim 20, wherein the particular content includes a musical compilation comprising a plurality of musical works.
- 23. (original) The system of claim 21, wherein the electronic content distribution system downloads the musical work to the user through an Internet connection pursuant to a

transaction including a redemption of the particular credit by the user.

- 24. (original) The system of claim 21, wherein the electronic content distribution system streams the musical work to the user through an Internet connection pursuant to a transaction including a redemption of the particular credit by the user.
- 25. (withdrawn) A method for receiving particularized credit in an electronic content distribution system that implements a network, the method comprising:

transmitting an identifier for a given read only optical storage medium through the network to a server in the electronic content distribution system, the identifier indicating that the given read only optical storage medium contains a particular content; and

receiving a particular credit based upon the transmission of the identifier, wherein the particular credit is usable for receiving the particular content through the electronic content distribution system.

- 26. (withdrawn) The method of claim 25, wherein the particular content includes a musical work.
- 27. (withdrawn) The method of claim 25, wherein the particular content includes a musical compilation comprising a plurality of musical works.
- 28. (withdrawn) The method of claim 25, wherein the identifier is a digital fingerprint that identifies the given read only optical storage medium.
- 29. (withdrawn) The method of claim 25, wherein the given read only optical storage medium is a compact disc.
- 30. (withdrawn) The method of claim 29, wherein the network is an Internet.
- 31. (withdrawn) The method of claim 30, wherein the particular content includes a musical work.

- 32. (withdrawn) The method of claim 30, wherein the particular content includes a musical compilation comprising a plurality of musical works.
- 33. (withdrawn) The method of claim 31, wherein the electronic content distribution system downloads the musical work to the user pursuant to a transaction including a redemption of the particular credit by the user.
- 34. (withdrawn) The method of claim 31, wherein the electronic content distribution system streams the musical work to the user pursuant to a transaction including a redemption of the particular credit by the user.
- 35. (withdrawn) An apparatus for receiving particularized credit in an electronic content distribution system that implements a network, the apparatus comprising:

means for transmitting an identifier for a given read only optical storage medium through the network to a server in the electronic content distribution system, the identifier indicating that the given read only optical storage medium contains a particular content; and

means for receiving a particular credit based upon the transmission of the identifier, wherein the particular credit is usable for receiving the particular content through the electronic content distribution system.

- 36. (withdrawn) The apparatus of claim 35, wherein the identifier is a digital fingerprint that identifies the given read only optical storage medium.
- 37. (withdrawn) The apparatus of claim 35, wherein the given read only optical storage medium is a compact disc.
- 38. (withdrawn) The apparatus of claim 37, wherein the particular content includes a musical work.
- 39. (withdrawn) The apparatus of claim 37, wherein the particular content includes a musical compilation comprising a plurality of musical works.

- 40. (withdrawn) The apparatus of claim 38, wherein the electronic content distribution system downloads the musical work to the user through an Internet connection pursuant to a transaction including a redemption of the particular credit by the user.
- 41. (withdrawn) The apparatus of claim 38, wherein the electronic content distribution system streams the musical work to the user through an Internet connection pursuant to a transaction including a redemption of the particular credit by the user.
- 42. (withdrawn) A system for receiving particularized credit in an electronic content distribution system that implements a network, the system comprising:

a processor; and

- a memory, in operative communication with the processor, which stores instructions that are executed by the processor to effectuate transmitting an identifier for a given read only optical storage medium through the network to a server in the electronic content distribution system, the identifier indicating that the given read only optical storage medium contains a particular content, receiving a particular credit based upon the transmission of the identifier, wherein the particular credit is usable for receiving the particular content through the electronic content distribution system.
- 43. (withdrawn) The system of claim 42, wherein the identifier is a digital fingerprint that identifies the given read only optical storage medium.
- 44. (withdrawn) The system of claim 42, wherein the given read only optical storage medium is a compact disc.
- 45. (withdrawn) The system of claim 44, wherein the particular content includes a musical work.

Application No.: 09/903,137

- 46. (withdrawn) The system of claim 44, wherein the particular content includes a musical compilation comprising a plurality of musical works.
- 47. (withdrawn) The system of claim 45, wherein the electronic content distribution system downloads the musical work to the user through an Internet connection pursuant to a transaction including a redemption of the particular credit by the user.
- 48. (withdrawn) The system of claim 45, wherein the electronic content distribution system streams the musical work to the user through an Internet connection pursuant to a transaction including a redemption of the particular credit by the user.
